

# TALLER 1

Enero 2013

# Editor visual

The screenshot shows the TinyMCE Advanced configuration page in the WordPress admin interface. The browser window title is "TinyMCE Advanced - Biblioteca de Ciencias del Trabajo - WordPress - Mozilla Firefox". The address bar shows the URL: "bibliotecas.unileon.es/ciencias-trabajo/wp-admin/options-general.php?page=tinymce-advanced".

The interface includes a sidebar with navigation links: Páginas, Comentarios, Apariencia, Plugins, Usuarios, Herramientas, and Ajustes. The main content area displays the configuration options for the visual editor, including a toolbar configuration section with the instruction "Drag and drop buttons onto the toolbars below." and a section for "Advanced Options" with checkboxes for "Advanced Link", "Hide all CSS classes in the editor menus", and "Stop removing the <p> and <br/> tags when saving and show them in the HTML editor".

At the bottom of the configuration page, there are two buttons: "Remove Settings" and "Save Changes".
